

REALIEF EXPERT

Kuya Bong App

Prototype Update & Feedback Session

A simple mobile app to help manage bookings, services, packages, and product follow-ups.

Prepared by: Analyst & Sales Team

Meeting date: 19 June 2026

Expert Care, Real Relief · Physiotherapy & Chiropractic

Understanding Kuya Bong's current business situation

Figure 1

Two clinics, one therapist

Kuya Bong moves between Clinic A & Clinic B to serve booked patients — schedules must avoid time conflicts.

Figure 2

Two kinds of business

Appointment-based services (Physiotherapy & Massage, Grounding Therapy) and herbal / supplement product sales.

Figure 3

Booking & package pain

Patients can't see free slots, may pick the wrong clinic or time, and can't track paid package sessions.

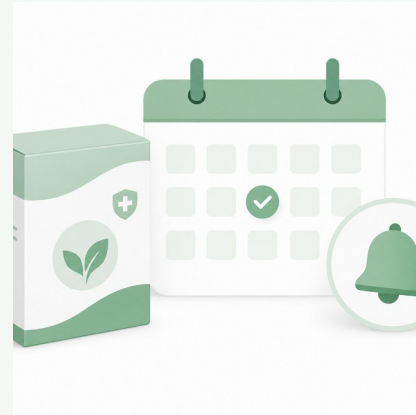

Figure 4

Product follow-up

Hard to remember what product was sold, when, and when to follow up before it runs out.

One app serving two main roles

● KUYA BONG / ADMIN

Manage clinics, services & therapists

Publish availability (clinic · service · time)

View, approve, move & create bookings

Packages: assign, track use, balance & expiry

Products, price & product follow-up list

Manage cancellation reasons

● PATIENT

Register, log in & reset password

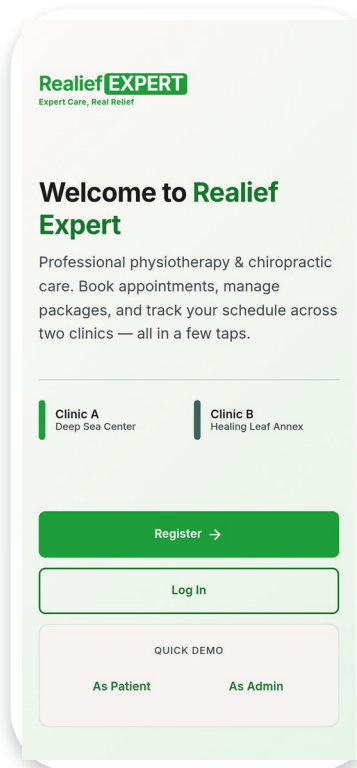

Book: service → clinic → date → time

Reschedule or cancel (with a reason)

View appointments & booking confirmation

View package balance & expiry

Family link: spouse & children

Kuya Bong App

One mobile app · role-based access

Key message: We are not building two apps — it is one app with different access depending on the user role.

Simple investment options to start using the app

All amounts are estimates for discussion. Store, hosting, domain, SMS & email are external costs that vary by provider, country & usage.

OPTION 1

Basic Launch

Lowest cost to get live — you run the day-to-day.

- **Google Play developer account** — publish on Android
- **Apple Developer account** — publish on iOS
- **Database / backend hosting** — starter / free tier to begin
- **Domain (if needed)** — app web address

Pay now
≈ \$140*

Total initial
≈ \$140*

Yearly onward
≈ \$115* / year

→ Best if Kuya wants the lowest starting cost.

OPTION 2

Managed Launch

Everything in Basic + we set up, publish & support.

- **Everything in Basic Launch** — accounts · hosting · domain
- **Setup & publishing assistance** — store submission & config
- **Monitoring & basic support** — we keep it running
- **Minor updates package** — small fixes after feedback

Pay now
≈ \$140* + setup*

Total initial
≈ \$540*

Yearly onward
≈ \$715* / year

→ Best if Kuya wants us to manage setup, publishing & early support.
