

Kuya Bong App - Demo Update Summary

Version

Prepared for: Raymond (Sales) | Date: 20 Jun 2026 | Ref: KBA-BP-20260620-003

This build adds the newest features from Kuya's latest meetings on top of the earlier demo. Everything below is live and ready to show.

New in This Update (v0.6)

- **Product Photos** Add one or more photos to a product; the app automatically shrinks and compresses large images. Photos appear with the product.
- **Staff Access & Audit** Kuya (Master Admin) can appoint trusted staff as Sub-Admins and switch each of 12 capabilities on/off from one central panel (bookings, appointments, clinics, therapists, patients, products, services, cancellation reasons, announcements, follow-ups, and the two report types). Important admin actions are recorded in an Audit Log.
- **Friends & Credit Transfer** Friends are separate from Family. Confirmed friends can transfer treatment-package sessions to each other; transferred sessions keep the original expiry date and every transfer is logged. Kuya can reverse a transfer if it hasn't been used yet.
- **Household Report** A per-household view: the account owner plus family members, total spending, the active package (start/expiry, sessions used/remaining), who used each session, and related friend transfers.

Already in the Demo (Earlier Updates)

- Clinic management (add/edit/deactivate, safe delete), announcements with expiry, and financial reports (product income + completed-session counts) shareable as PDF.
- Service types & durations, therapist assignment, conflict-free booking, and cancellation reasons.

How to Demo (Login Accounts)

Role	Email	Password
Master Admin (Kuya)	admin@reliefexpert.app	admin123
Sub-Admin (Erick)	staff@reliefexpert.app	staff123
Patient (Maria)	maria@example.com	patient123
Patient (Ahmed)	ahmed@example.com	patient123

- **Friends/transfer** Log in as Maria and Ahmed, add each other as Friends, confirm, then transfer package sessions. Reverse it from Master Admin > Settings > Credit Transfers.
- **Staff access** Log in as Erick to show the limited menu; as Kuya, change permissions in Settings > Sub-Admins.
- **Reports** Master Admin > Settings > Household Report / Audit Log.

Pending Decisions / Next Phase

- Transfer rules to confirm with Kuya: partial vs full, sessions vs money, re-transfer allowed, reversal policy (demo currently: partial, sessions, re-transfer allowed, Kuya-reversible).
- Real phone push notifications and native phone PDF share (demo uses in-app + browser Save-as-PDF).
- Service income value, sending announcements to selected customers, and Excel/CSV export.

Demonstration build with sample data and no live backend yet. Prepared by the development team.
